

Global Economic Calendar

31 August - 6 September

Economics
Global

- ◆ In the US, we forecast nonfarm payrolls to have risen by 55,000 in August, with the unemployment rate steady at 4.1%
- ◆ We expect the eurozone's August inflation print to show a 3.2% increase in consumer prices, reflecting rises in energy prices and supply pressures from Europe's drought
- ◆ In India, GDP growth is expected to remain robust in Q2, led by GST cuts, monetary easing, and precautionary inventory build-up for manufacturing

What we're watching this week

Country	Time (BST)	Indicator	Unit	Prior	HSBC
Monday, 31 August					
Japan	00:50	Industrial production (Jul, flash)	% m-o-m/y-o-y	1.9/4.9	-0.5/2.5
Mainland China	02:30	Manufacturing PMI (Aug)	Index	49.2	-
Mainland China	02:30	Non-manufacturing PMI (Aug)	Index	49.0	-
Poland	08:30	CPI (Aug, flash)	% y-o-y	3.0	2.9
India	11:30	GDP (Q2)	% y-o-y	7.8	7.5
India	11:30	GVA (Q2)	% y-o-y	7.9	7.6
Germany	13:00	HICP (Aug, flash)	% m-o-m/y-o-y	0.9/2.8	0.2/3.0
Tuesday, 1 September					
Indonesia	05:00	CPI (Aug)	% y-o-y	2.9	3.1
Eurozone	10:00	HICP (Aug, flash)	% y-o-y	2.9	3.2
Brazil	13:00	GDP (Q2)	% q-o-q/y-o-y	1.1/1.8	0.4/1.8
US	15:00	ISM manufacturing (Aug)	Index	55.6	55.0
Wednesday, 2 September					
South Korea	00:00	CPI (Aug)	% y-o-y	2.8	3.2
Australia	02:30	GDP (Q2)	% q-o-q/y-o-y	0.3/2.5	0.1/1.7
US	13:15	ADP employment, monthly change (Aug)	000s	44	52
Thursday, 3 September					
Türkiye	08:00	CPI (Aug)	% y-o-y	31.8	31.5
US	15:00	ISM services (Aug)	Index	54.1	53.7
Friday, 4 September					
Philippines	02:00	CPI (Aug)	% y-o-y	6.2	5.9
Germany	07:00	Industrial orders (Jul)	% m-o-m/y-o-y wda	3.1/6.5	0.5/10.3
US	13:30	Nonfarm payrolls, monthly change (Aug)	000s	-23	55
US	13:30	Unemployment rate (Aug)	%	4.1	4.1

Major releases preview

Monday, 31 August

Poland: CPI (Aug, flash) 08:30 BST

The government's decision to reduce the VAT rate again temporarily from 23% to 8% between 16-31 August should more than offset fuel price increases in the first half of this month. Accordingly, we anticipate headline inflation might inch lower to 2.9% y-o-y in August from 3.0% in July while core will likely remain unchanged at 3.1% y-o-y.

%	Prior	Consensus	HSBC
CPI (y-o-y)	3.0	3.3	2.9
Core CPI (y-o-y)	3.1	-	3.1

India: GDP (Q2) 11:30 BST

Amid the energy shock, our database of 100 growth indicators points to moderating momentum in Q2 2026. Even so, growth remained notably strong, supported by fiscal and monetary easing (2025 GST cuts, 125bp repo cuts and surplus liquidity). Manufacturing held up as firms built precautionary inventories and brought forward non-oil exports, benefiting from lower US tariffs ahead of potential Section 301 action. Services also expanded strongly, underpinned by robust bank credit growth and easier financial conditions. We expect Q2 2026 GVA at 7.6%. Given a higher subsidy outgo, we anticipate GDP growth to be a tad slower at 7.5%.

% y-o-y	Prior	Consensus	HSBC
GDP	7.8	7.2	7.5
GVA	7.9	7.3	7.6

Germany: Inflation (Aug, flash) 13:00 BST

In August, we expect the national CPI to rise by 0.2% m-o-m on the back of food and fuel prices as the low water levels on the Rhine River leave their mark. The y-o-y rate would rise to 2.9%, returning to the multi-month high recorded in April 2026. By contrast, services inflation may lose momentum in August as holiday-related prices normalise in line with seasonal patterns, which means we expect the HICP to also tick up by 0.2% on the month.

% m-o-m/y-o-y	Prior	Consensus	HSBC
CPI	0.8/2.8	-/2.9	0.2/2.9
HICP	0.9/2.8	0.3/3.1	0.2/3.0

Tuesday, 1 September

Indonesia: CPI (Aug) 05:00 BST

Garlic and onion prices have moderated, while rice prices remain steady. Prices of red chilli, chicken and pepper have edged up over the month, adding to food inflation. Non-subsidised fuel prices were reduced slightly, effective 1 August. Jet fuel prices have also eased, but remain higher than the baseline used by the government to set the airfare cap. Gold prices, which have a weight of c1% in the CPI basket, have also risen over the month. Overall, we expect inflation to rise to 3.1% y-o-y from 2.9% last month.

% y-o-y	Prior	Consensus	HSBC
CPI	2.9	3.1	3.1
Core CPI	2.8	2.8	2.8

Eurozone: Inflation (Aug, flash) 10:00 BST

July inflation inched up to 2.9% after June's 2.8%, with core inflation up to 2.5% from 2.4% y-o-y, still with little evidence of broadening pressures on food prices. We expect headline inflation to accelerate to 3.2% y-o-y in August. That reflects the re-rise in energy prices and supply pressures from Europe's drought, partly offset by slowing unit labour cost growth. Food inflation will be unlikely to stay at such low rates, so we will be on the lookout for evidence of a broadening out of the energy shock.

%	Prior	Consensus	HSBC
Headline HICP y-o-y	2.9	3.2	3.2
Core HICP y-o-y	2.5	2.5	2.6

Brazil: GDP (Q2) 13:00 BST

We estimate that Brazilian GDP expanded by 1.8% y-o-y in Q2 26, in line with the 1.8% y-o-y recorded in 1Q26. On a sequential basis, we expect GDP growth to have decelerated from 1.1% q-o-q sa (unrevised) to 0.4% q-o-q sa between Q1 26 and Q2 26. After a strong Q1 26, we estimate that sequential growth slowed across most sectors, with the payback from the strong expansion in the previous quarter being concentrated in mining and extraction, as well as agriculture. Find out more details in our [2Q26 GDP Preview: More evidence of slowdown](#) from 24 August.

%	Prior	Consensus	HSBC
q-o-q sa	1.1	0.4	0.4
y-o-y	1.8	1.8	1.8
4Q accumulated, y-o-y	2.0	1.8	1.8

Israel: Base rate decision 14:00 BST

Looking at the inflation picture alone continues to show room for further easing. Headline inflation moderated to 1.5% y-o-y in July and has been at or below the 2% BOI mid-point target since the start of the year. At the same time, the resumption of fighting between the US and Iran creates significant uncertainty. Oil prices have risen from their end-June lows, pushing domestic gasoline prices up by 8% m-o-m in August. Other data has also been less dovish. The Q2 GDP rebound was much firmer than expected, even after adjusting for production abroad. Wage growth also remains strong. Considering all this, we expect a pause in September. This is likely to be followed by one more cut in Q4 2026 and further easing in 2027.

%	Prior	Consensus	HSBC
Base rate	3.50	3.50	3.50

Wednesday, 2 September
South Korea: CPI (Aug) 00:00 BST

We expect Korea's August headline inflation to accelerate to 3.2% y-o-y, driven by a likely jump in core inflation (3.3% vs. 2.6% in July). That said, we note the jump in core inflation will have largely come from the low base effect from the same month last year (1.3% in August 2025 vs. 2.0% in July 2025), when public mobile communication fees were halved for the month. Accounting for the one-off, we estimate both headline/core inflation numbers for August this year would have come in more modestly at 2.7%/2.7%, respectively, as sequential momentum in core inflation likely softened from July's uptick. Meanwhile, available proxies suggest that sequential declines in fresh food prices led to a moderation in non-core inflation (2.6% y-o-y vs. 3.4% in July), offsetting part of the y-o-y rise in core inflation.

% m-o-m/y-o-y	Prior	Consensus	HSBC
CPI	2.8	3.1	3.2
Core CPI	2.6	-	3.3

Australia: GDP (Q2) 02:30 BST

Growth has slowed in Australia, in response to three 'shocks' hitting the economy – the RBA's rate hikes, the Middle East conflict, and the tax changes in the May budget. While the full impact of these will not show up fully in Q2, we see momentum weakening in the quarter. Timelier consumer and business sentiment indicators were well below average in Q2. While household consumption appears to have held up in the quarter, business investment has likely contracted. Net exports also likely subtracted from growth. Our central case sees GDP growth of 0.1% q-o-q and 1.7% y-o-y. At this rate, growth is below our estimate of 'potential' – the RBA needs to slow demand in the economy to help bring inflation back down to target. Looking ahead, the faster-than-expected cooling in the housing market is expected to weaken consumer spending.

%	Prior	Consensus	HSBC
q-o-q s.a/y-o-y	0.3/2.5	0.4/1.9	0.1/1.7

New Zealand: RBNZ Rate Decision 03:00 BST

Inflation is above the RBNZ's 1-3% target. In Q2, headline inflation spiked higher and core inflation measures – while still contained in the upper half of the RBNZ's 1-3% target band – drifted higher too. The economy is also gradually recovering. Labour demand improved in Q2, although the Middle East conflict appears to have modestly impacted growth. The RBNZ has also been hawkish, having hiked in July alongside a tightening bias. Our central case is that the RBNZ will raise its cash rate by 25bp in September, to 2.75%. We expect the RBNZ to also continue to maintain a tightening bias, signalling that further rate hikes are likely, in its rhetoric as well as in its updated cash rate projection.

%	Prior	Consensus	HSBC
Official Cash Rate	2.50	2.75	2.75

Canada: Bank of Canada rate decision 14:45 BST

We expect the Governing Council (GC) to keep the policy rate on hold at 2.25% in September's meeting. There won't be a new set of forecasts at this meeting, but with the recent spate of US-Canada tariffs, risks to the economic outlook have clearly risen – even if Q2 GDP is expected to have rebounded (consensus: 3.4% q-o-q annualised). Something we will be watching out for at the press conference will be any detail on how the GC is likely to approach these added near-term risks, especially weighed against expected Q2 resilience. If the GC place a strong emphasis on these risks, or if Q2 GDP disappoints, we could see some dovish repricing. Otherwise, risks to our view of no change in policy rates will remain to the upside.

%	Prior	Consensus	HSBC
Policy rate	2.25	2.25	2.25

Thursday, 3 September
Malaysia: Bank Negara Malaysia rate announcement 08:00 BST

Malaysia recorded a strong pace of economic growth in H1 2026, owing to better-than-expected trade out-turn and continued domestic resilience. In the latest GDP print from Q2, the economy grew by 6% y-o-y, reflecting a solid sequential momentum of 2.5% q-o-q, sa. Inflation has also been benign in the economy with headline CPI contained at 1.8% y-o-y and core CPI at 2.0% y-o-y, year-to-date (till July). This current economic situation provides BNM the comfort to stay on hold and not rush to any rate hikes. We maintain our long-held view of BNM keeping policy rates steady at 2.75% through the end of 2027.

%	Prior	Consensus	HSBC
Overnight policy rate	2.75	2.75	2.75

Türkiye: CPI (Aug) 08:00 BST

We expect prices to rise by 1.8% m-o-m (same as in July) and 31.5% y-o-y. Diesel and gasoline prices rose by 10% m-o-m on average in August, which is set to add 0.3pp to headline inflation. Tax-related price increases for the alcohol and tobacco category will also have a negative impact (we have assumed a c10% price rise on average; 0.3pp impact). Our end-2026 and end-2027 inflation forecasts are 28% and 15%. Cooling domestic demand, continued improvement in inflation expectations, and real FX appreciation should all support disinflation. That said, risks to our forecast are tilted to the upside, most obviously through the oil price channel.

%	Prior	Consensus	HSBC
CPI (y-o-y)	31.8	31.6	31.5
Core CPI (y-o-y)	29.9	31.1	30.4

Friday, 4 September
Philippines: CPI (Aug) 02:00 BST

Headline inflation likely softened to 5.9% y-o-y but remains well above the central bank's 2-4% target band. Rice prices, albeit still elevated, were roughly stable from the previous month. Gasoline prices, too, were stable on a month-on-month basis as the price rollbacks seen in early August were offset by price hikes in the second half. Electricity rates were also adjusted downwards in August due to regulatory refunds (Meralco, 10 August 2026). Risks to inflation, however, are tilted to the upside. Prices of select vegetable items, such as pechay, lettuce, eggplants, and bitter melons all steeply rose in the 2nd half of the month, perhaps due to tighter supply conditions caused by adverse weather. In addition, core CPI likely softened as well due to weak demand.

% y-o-y	Prior	Consensus	HSBC
CPI	6.2	6.1	5.9
Core CPI	4.2	-	4.0

US: Labour market (Aug) 13:30 BST

We estimate nonfarm payrolls rose 55,000 in August. While monthly readings have been volatile, the average change over the first seven months of this year stands at +61,000. The average monthly change in private-sector employment from January through July was +71,000. Weekly readings from ADP suggest that private-sector job creation picked up from late March through May but then softened somewhat through June and July.

It will be interesting to see how average hourly earnings evolved in August after a muted 0.1% m-o-m increase in July. In a recent speech, Boston Fed President Susan Collins noted "carefully monitoring a wide range of inflation expectations measures, and how they are influencing firms' price-setting behaviours and workers' wage demand." We look for a 0.3% m-o-m increase in August, with the y-o-y rate slowing to 3.1% from 3.2%.

Finally, it will be important to watch the unemployment rate and the labour force participation rate. A recent analysis from the St. Louis Fed noted that the labour force participation rate has fallen sharply this year, but that nearly half of the drop can be traced to an unusually large population control introduced in January 2026, which corrected the population data of different demographic groups that are used to measure the level of participation. We anticipate that the unemployment rate was steady at 4.1% in August, with the participation rate rising to 61.5% from 61.4%.

FX forecasts: selected economies shown

	Change	Current	Q4 26 (f)	Comments
G10				
EURUSD	-4%	1.16	1.12	Tighter financial conditions in response to higher energy prices weigh on growth, keeping EUR-USD on the back foot
GBPUSD	-5%	1.36	1.29	Cyclical and structural weakness keep BoE cautious, and policy uncertainty lingers leaving GBP-USD vulnerable
USDJPY	2%	159	162	There is high intervention risk above 160, but upward pressures in USD-JPY is hard to overcome without hawkish BoJ rate hikes and less fiscal risk
AUDUSD	-1%	0.72	0.71	Stagflationary risks are rising which is weighing on the AUD even if the RBA hikes again. If strong US data helps avoid a negative global growth impulse, the AUD may make modest gains
EURNOK	3%	10.88	11.20	We expect further NOK strength to be held back given the recent oil-equity backdrop. The Norwegian trade balance has already appeared to peak which provides less of an offset to portfolio outflows
EURCHF	-3%	0.94	0.91	Rising oil prices have weighed on the CHF due to its low yield, but the currency may begin to strengthen if global equities show signs of protracted decline
EURSEK	-3%	11.09	10.80	Although the fundamentals for the SEK are attractive, its low yield is holding it back from moving in line with European equities
Asia				
USDCNY	0%	6.72	6.72	RMB internationalisation and strong productivity growth structurally support the RMB, though the pace of appreciation is slowing amid cyclical challenges
USDKRW	9%	1381	1500	Both potential FX supply (current account surplus) and FX demand (foreigners' equity outflows) have become very large this year, which means a volatile USD-KRW in a wide range
USDMYR	3%	4.03	4.15	Even with a decent trade surplus, emerging domestic uncertainty and a slowdown in portfolio inflows means the USD-MYR cannot ignore the broad USD trend
USDTHB	2%	32.87	33.40	Structurally weak growth, a dovish BoT keeping interest rates very low, deteriorating fiscal metrics – these make THB a good funding currency
USDSGD	2%	1.27	1.30	USD-SGD is highly correlated with the DXY index, especially given the SGD's low yields. But any rise should be tempered by trend SGD NEER appreciation
USDINR	0%	95.55	95.50	Earlier measures to attract inflows are ending; structural current account deficit and a large short FX forward book means trend INR depreciation
Latam				
USDMXN	5%	16.99	17.75	Trade negotiations with the US appear to be moving forward relatively well and MXN is benefiting from a pivot away from BRL
USDBRL	-3%	5.15	5.00	We are cautious in the near term as BRL may weaken into the elections, though polling (which is tightening) will remain key
USDCLP	0%	922	920	Growth sentiment has weakened and higher oil prices are both a headwind to the CLP; growth needs to bottom out for CLP to rally
EMEA				
EURPLN	-3%	4.33	4.20	The zloty should be supported by robust domestic growth and substantial EU fund inflows
USDZAR	8%	16.01	17.30	USD strength is likely to be a headwind. However, SARB policy credibility and a resilient external position should provide partial offsetting support

Important disclosures

Foreign exchange: Basis for financial analysis

This document has been prepared and is being distributed by the Research Department of HSBC and is intended solely for the clients of HSBC and is not for publication to other persons, whether through the press or by other means.

This document is for information purposes only and it should not be regarded as an offer to sell or as a solicitation of an offer to buy the securities or other investment products mentioned in it and/or to participate in any trading strategy. Advice in this document is general and should not be construed as personal advice, given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. If necessary, seek professional investment and tax advice.

Certain investment products mentioned in this document may not be eligible for sale in some states or countries, and they may not be suitable for all types of investors. Investors should consult with their HSBC representative regarding the suitability of the investment products mentioned in this document and take into account their specific investment objectives, financial situation or particular needs before making a commitment to purchase investment products.

The value of and the income produced by the investment products mentioned in this document may fluctuate, so that an investor may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Value and income from investment products may be adversely affected by exchange rates, interest rates, or other factors. Past performance of a particular investment product is not indicative of future results.

HSBC believes that investors utilise various disciplines and investment horizons when making investment decisions, which depend largely on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations. HSBC's currency trade ideas on deliverable FX forwards (DF) or non-deliverable FX forwards (NDF) are usually identified on a time horizon of up to three months, although HSBC reserves the right to extend this time horizon on a discretionary, trade-by-trade basis.

HSBC believes an investor's decision to buy or sell an instrument should depend on individual circumstances such as the investor's existing holdings and other considerations. Different securities firms use a variety of terms as well as different systems to describe their recommendations. Investors should carefully read the definitions of the recommendations used in each research report. In addition, because research reports contain more complete information concerning the analysts' views, investors should carefully read the entire research report and should not infer its contents from the recommendation. In any case, recommendations should not be used or relied on in isolation as investment advice.

Definitions for currency trades on DFs and NDFs

Buy: refers to buying the first currency in the named pair in exchange for the second currency in the named pair.

Sell: refers to selling the first currency in the named pair in exchange for the second currency in the named pair.

The tenor of the instrument will be denoted and will refer to a settlement date relative to the opening date of the trade idea e.g. 1m refers to a settlement date 1 month forward from the open date of the trade idea. NDF trades normally fix two working days prior to the settlement date.

Distribution of currency trades

The nature of foreign exchange forward trade ideas is such that there will always be an equal number of buy and sell trades (buying one currency in exchange for selling another), both outstanding and historically.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at <http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures>.

HSBC and its affiliates will from time to time sell to and buy from customers the securities/instruments, both equity and debt (including derivatives) of companies covered in HSBC Research on a principal or agency basis or act as a market maker or liquidity provider in the securities/instruments mentioned in this report.

Analysts, economists, and strategists are paid in part by reference to the profitability of HSBC which includes investment banking, sales & trading, and principal trading revenues.

Whether, or in what time frame, an update of this analysis will be published is not determined in advance.

Non-U.S. analysts may not be associated persons of HSBC Securities (USA) Inc, and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with the subject company, public appearances and trading securities held by the analysts.

Economic sanctions laws imposed by certain jurisdictions such as the US, the EU, the UK, and others, may prohibit persons subject to those laws from making certain types of investments, including by transacting or dealing in securities of particular issuers, sectors, or regions. This report does not constitute advice in relation to any such laws and should not be construed as an inducement to transact in securities in breach of such laws.

For disclosures in respect of any company mentioned in this report, please see the most recently published report on that company available at www.hsbcnet.com/research. HSBC Private Bank clients should contact their Relationship Manager for queries regarding other research reports. In order to find out more about the proprietary models used to produce this report, please contact the authoring analyst.

HSBC may use Artificial Intelligence (AI) tools approved for adoption within HSBC in the development of its research reports, utilizing these technologies to analyse large volumes of data, enhance efficiency and improve the overall user experience. This includes but is not limited to paraphrasing, developing suitable captions and supporting data visualisation. It is important to note that while AI tools assist in various aspects of report creation, all investment recommendations and opinions presented herein are formulated and approved exclusively by our research analysts. The final content of the report reflects the professional judgement and expertise of our research analysts, ensuring compliance with regulatory standards and maintaining the integrity of our research process.

Additional disclosures

- 1 This report is dated as at 28 August 2026.
- 2 All market data included in this report are dated as at close 27 August 2026, unless a different date and/or a specific time of day is indicated in the report.
- 3 HSBC has procedures in place to identify and manage any potential conflicts of interest that arise in connection with its Research business. HSBC's analysts and its other staff who are involved in the preparation and dissemination of Research operate and have a management reporting line independent of HSBC's Investment Banking business. Information Barrier procedures are in place between the Investment Banking, Principal Trading, and Research businesses to ensure that any confidential and/or price sensitive information is handled in an appropriate manner.
- 4 You are not permitted to use, for reference, any data in this document for the purpose of (i) determining the interest payable, or other sums due, under loan agreements or under other financial contracts or instruments, (ii) determining the price at which a financial instrument may be bought or sold or traded or redeemed, or the value of a financial instrument, and/or (iii) measuring the performance of a financial instrument or of an investment fund.

This document has been issued by HSBC Securities and Capital Markets (India) Private Limited ("HSBC") for the information of its customers only. HSBC Securities and Capital Markets (India) Private Limited is registered as "Research Analyst" (Reg. No. INH000001287), Merchant Banker (Reg. No. INM000010353) and Stock Broker (Uniform Reg. No. INZ000234533) and regulated by the Securities and Exchange Board of India. If it is received by a customer of an affiliate of HSBC, its provision to the recipient is subject to the terms of business in place between the recipient and such affiliate. This document is not and should not be construed as an offer to sell or the solicitation of an offer to purchase or subscribe for any investment. HSBC has based this document on information obtained from sources it believes to be reliable but which it has not independently verified; HSBC makes no guarantee, representation or warranty and accepts no responsibility or liability as to its accuracy or completeness. Expressions of opinion are those of the Research Division of HSBC only and are subject to change without notice. From time to time research analysts conduct site visits of covered issuers. HSBC policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits. HSBC and its affiliates and/or their officers, directors and employees may have positions in any securities mentioned in this document (or in any related investment) and may from time to time add to or dispose of any such securities (or investment). HSBC and its affiliates may act as market maker or have assumed an underwriting commitment in the securities of companies discussed in this document (or in related investments), may sell them to or buy them from customers on a principal basis and may also perform or seek to perform investment banking or underwriting services for or relating to those companies and may also be represented in the supervisory board or any other committee of those companies. Details of Associates may be obtained from or for any Grievances on the report published by HSBC Securities and Capital Markets (India) Private Limited may be reported to Compliance Officer: Neha Malviya, Email: neha.malviya@hsbc.co.in, Contact: +91 22 4089 1536. The information and opinions contained within the research reports are based upon publicly available information and rates of taxation applicable at the time of publication which are subject to change from time to time. Past performance is not necessarily a guide to future performance. The value of any investment or income may go down as well as up and you may not get back the full amount invested. Where an investment is denominated in a currency other than the local currency of the recipient of the research report, changes in the exchange rates may have an adverse effect on the value, price or income of that investment. In case of investments for which there is no recognised market it may be difficult for investors to sell their investments or to obtain reliable information about its value or the extent of the risk to which it is exposed. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. **Investments in securities markets are subject to market risks. Read all the related documents carefully before investing.** The document is intended to be distributed in its entirety. Unless governing law permits otherwise, you must contact a HSBC Group member in your home jurisdiction if you wish to use HSBC Group services in effecting a transaction in any investment mentioned in this document.

In the UK, this publication is distributed by HSBC Bank plc for the information of its Clients (as defined in the Rules of FCA) and those of its affiliates only. Nothing herein excludes or restricts any duty or liability to a customer which HSBC Bank plc has under the Financial Services and Markets Act 2000 or under the Rules of FCA and PRA. A recipient who chooses to deal with any person who is not a representative of HSBC Bank plc in the UK will not enjoy the protections afforded by the UK regulatory regime. HSBC Bank plc is regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

In the European Economic Area, this publication has been distributed by HSBC Continental Europe or by such other HSBC affiliate from which the recipient receives relevant services.

In Japan, this publication has been distributed by HSBC Securities (Japan) Co., Ltd. In Hong Kong, this document has been distributed by The Hongkong and Shanghai Banking Corporation Limited in the conduct of its Hong Kong regulated business for the information of its institutional and professional customers; it is not intended for and should not be distributed to retail customers in Hong Kong, unless permitted otherwise. The Hongkong and Shanghai Banking Corporation Limited makes no representations that the products or services mentioned in this document are available to persons in Hong Kong or are necessarily suitable for any particular person or appropriate in accordance with local law. All inquiries by such recipients must be directed to The Hongkong and Shanghai Banking Corporation Limited. In Korea, this publication is distributed by either The Hongkong and Shanghai Banking Corporation Limited, Seoul Securities Branch ("HBAP SLS") or The Hongkong and Shanghai Banking Corporation Limited, Seoul Branch ("HBAP SEL") for the general information of professional investors specified in Article 9 of the Financial Investment Services and Capital Markets Act ("FSCMA"). This publication is not a prospectus as defined in the FSCMA. It may not be further distributed in whole or in part for any purpose. Both HBAP SLS and HBAP SEL are regulated by the Financial Services Commission and the Financial Supervisory Service of Korea. In Singapore, this publication is distributed by The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch for the general information of institutional investors or other persons specified in Sections 274 and 304 of the Securities and Futures Act 2001 of Singapore ("SFA") and accredited investors and other persons in accordance with the conditions specified in Sections 275 and 305 of the SFA. Only Economics or Currencies reports are intended for distribution to a person who is not an Accredited Investor, Expert Investor or Institutional Investor as defined in SFA. The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch accepts legal responsibility for the contents of reports. This publication is not a prospectus as defined in the SFA. It may not be further distributed in whole or in part for any purpose. The Hongkong and Shanghai Banking Corporation Limited Singapore Branch is regulated by the Monetary Authority of Singapore. Recipients in Singapore should contact a "Hongkong and Shanghai Banking Corporation Limited, Singapore Branch" representative in respect of any matters arising from, or in connection with this report. Please refer to The Hongkong and Shanghai Banking Corporation Limited Singapore Branch's website at www.business.hsbc.com.sg for contact details. In Australia, this publication has been distributed by The Hongkong and Shanghai Banking Corporation Limited (ABN 65 117 925 970, AFSL 301737) for the general information of its "wholesale" customers (as defined in the Corporations Act 2001). Where distributed to retail customers, this research is distributed by HSBC Bank Australia Limited (ABN 48 006 434 162, AFSL No. 232595). These respective entities make no representations that the products or services mentioned in this document are available to persons in Australia or are necessarily suitable for any particular person or appropriate in accordance with local law. No consideration has been given to the particular investment objectives, financial situation or particular needs of any recipient.

HSBC Securities (USA) Inc. accepts responsibility for the content of this research report prepared by its non-US foreign affiliate. The information contained herein is under no circumstances to be construed as investment advice and is not tailored to the needs of the recipient. All US persons receiving and/or accessing this report and wishing to effect transactions in any security discussed herein should do so with HSBC Securities (USA) Inc. in the United States and not with its non-US foreign affiliate, the issuer of this report. HSBC México, S.A., Institución de Banca Múltiple, Grupo Financiero HSBC is authorized and regulated by Secretaría de Hacienda y Crédito Público and Comisión Nacional Bancaria y de Valores (CNBV). In Brazil, this document has been distributed by Banco HSBC SA ("HSBC Brazil"), and/or its affiliates. As required by Resolution No. 20/2021 of the Securities and Exchange Commission of Brazil (Comissão de Valores Mobiliários), potential conflicts of interest concerning (i) HSBC Brazil and/or its affiliates; and (ii) the analyst(s) responsible for authoring this report are stated on the chart above labelled "HSBC & Analyst Disclosures".

If you are a customer of HSBC International Wealth & Premier Banking ("IWPB"), including HSBC Private Bank, you are eligible to receive this publication only if: (i) you have been approved to receive relevant research publications by an applicable HSBC legal entity; (ii) you have agreed to the applicable HSBC entity's terms and conditions and/or customer declaration for accessing research; and (iii) you have agreed to the terms and conditions of any other internet banking, online banking, mobile banking and/or investment services offered by that HSBC entity, through which you will access research publications (collectively with (ii), the "Terms"). If you do not meet the above eligibility requirements, please disregard this publication and, if you are a IWPB customer, please notify your Relationship Manager or call the relevant customer hotline. Distribution of this publication is the sole responsibility of the HSBC entity with whom you have agreed the Terms. Receipt of research publications is strictly subject to the Terms and any other conditions or disclaimers applicable to the provision of the publications that may be advised by IWPB.

Should you wish to use AI technology (computational, statistical, machine-learning or other artificial intelligence techniques to infer or learn from data to find patterns, take actions, make decisions, or generate output) to help you analyse, summarise or evaluate this publication and/or any other research materials provided to you by HSBC, you shall seek HSBC consent in advance of any such use and not upload this publication and/or any other research materials produced by HSBC to an AI system or otherwise use AI technology in connection with the research services HSBC provides to you without our consent.
